**SECTION - A****(READING)**

- 1) Read the passage given below and answer the questions that follow:-

There are several indicators of a developed nation. It is economically, agriculturally and technologically advanced. There is all round prosperity. The benefits of prosperity reach the common people. They have a reasonable life span and enjoy the basic comforts and good health. They are able to educate and feed their children well. Poverty, illiteracy, ignorance, disease and inequalities are reduced to a minimum. Quality goods are produced in abundance and exports keep on rising. The nation is able to protect its security as it is self-reliant in defence and has a standing in the international forum.

India, even after more than sixty five years since independence is branded as a developing country. Achieving the developed status means the major transformation of our national economy to make it one of the largest economies of the world, where people live well and above the poverty line. The transformation can be materialised within the next 15 to 20 years as India has the necessary potential. Our natural resources are richer as compared to those of many other countries. We have abundant supplies of all the ores and minerals. We have rich bio-diversity, abundant sunshine, varied agro-climatic conditions and plenty of rainfall all over India. The country either already has the necessary technologies or can develop them easily. Our people and our farmers not only have a great learning capability but most of them also have an entrepreneurial and competitive spirit. Avenues to channelise this spirit constructively and productively are required. We need the will to take action and commit ourselves to be one of the world leaders. We must resolve to work hard with a long term vision.

Technology is the highest wealth generator in the shortest possible time. It can provide us with infrastructure and help transform education and training, food and processing, industries and agriculture. It is the key to achieving quality products in an increasingly competitive market and to continually upgrading human skills. It is the only vital input for ensuring health security and better living conditions for people. It can enable us to double cereals by 2020 and to make arrangements for their storage, transportation, distribution and marketing. It can make us leaders in machine tool industries. Through Software engineering we can enter computer-aided design and computer-aided manufacturing.

Therefore, the major role in India's development is to be played by the vast pool of our talented scientists, researchers and technologists. They should shed pessimism and think big because they are the only ones who understand the forces of technological modernisation. They should take it as a challenge to make India a developed country. They must spearhead the movement by talking about what can be done and encouraging people that difficulties can be overcome. They must extend all possible help to industries, business managers, administrators and others.

- a) Write the basic fields in which a developed country is advanced. [1]
- b) What kind of life do the people in a developed country live? [1]
- c) What is required for achieving the developed status for India? [1]
- d) "Technology is the highest wealth generator in the shortest time" How? [1]
- e) Who can play a major role in India's development? [1]
- f) How can India enter computer-aided design and manufacturing? [1]

Find out a word from the passage which means:

- g) A machine for producing electricity = \_\_\_\_\_. [1]
- h) A large quantity more than enough = \_\_\_\_\_. [1]
- i) The state of having good fortune, wealth, money etc. \_\_\_\_\_. [1]

2) Read the following passage and answer the questions that follow:

Work is essential for man. It is a blessing. It is one of the precious privileges he has. It is the source of all other rights. It brings him the good things of life and promotes his well-being. Work is an integral part of life. Without it life is deprived of its substance and character.

Work gives us happiness. It banishes vice and poverty from life. Work, according to Carlyle, is the grand cure of all the maladies that beset mankind. It is key to all progress. Work is life, idleness is death.

The prosperity of any nation depends on the work of the people there. If they remain like lotus-eaters, no nation can progress or achieve anything remarkable. The prosperity achieved by nations like Japan and Israel bears out this. No pains, no gains.

All kind of work deserve our respect. But there are a number of people who consider some kinds of work ignoble and inferior. The work of farmers is much more important than that of teachers. The reason is that if the farmers do not work, we shall not get any food-stuff. If street-cleaners do not work, life in cities and town will prove difficult. "It does not disgrace a gentleman" says Ruskin," to become an errand boy or a day labourer, but it disgraces him much to become a knave and a thief".

For Carlyle, work is worship. According to him, there is perennial nobleness and even sacredness in work. To work is to pray. The worker is the saviour of society, the redeemer of the race, Tagore says God is the tiller of the hard ground and the path-maker. "He is with them in sun and in shower and his garment is covered with dust." The best form of worship, according to Gurudev, is to work and serve others.

It is necessary for our young men and women to recognize the dignity of labour. Most of them prefer white collar jobs to manual work. Manual work according to Gandhiji, gives an opportunity to all who wish to take part in the government and the well-being of the state. We should look up to the worker who earns his livelihood by the sweat of his brow.

- a) On the basis of your reading of the above passage make notes on it using headings and sub-headings. [4]
- b) Write a summary of the passage and suggest a suitable title. [2]

**SECTION - B**  
**(WRITING)**
