

## IT-ITES Marking Scheme for Model Question of Class 10<sup>th</sup>

| Ser No | Answer                                                                              | Mark |
|--------|-------------------------------------------------------------------------------------|------|
| 1.     | Concept and example                                                                 | 5    |
| 2.     | Write steps to extract Table from table<br>Or<br>Write any 5 Avantages of Data base | 5    |
| 3.     | Write any 5 data type with example<br>Or<br>Define style and any 5 style            | 5    |
| 4.     | Define Dbms and Data base                                                           | 3    |
| 5.     | Concept Data consistency                                                            | 3    |
| 6.     | Write steps to modify style                                                         | 3    |
| 7.     | Write steps to insert image and rotate                                              | 3    |
| 8.     | Define form and Report write any 2<br>Write health, safety rule                     | 3    |
| 9.     | Communication and its type<br>Or<br>Basic safety rules                              | 3    |
| 10.    | Definitions                                                                         | 2    |
| 11.    | Definitions                                                                         | 2    |
| 12.    | Definitions                                                                         | 2    |
| 13.    | Define communication                                                                | 2    |
| 14.    | Need of tbale of toc with Example<br>Or<br>Verbal communication                     | 2    |
| 15.    | Definitions<br>Or<br>Write any 2 work place Hazard                                  | 2    |
| 16.    | (B) Bargaining                                                                      | 1    |
| 17.    | (a) <b><u>Joint Photographic Experts Group</u></b>                                  | 1    |
| 18.    | (C) .odt                                                                            | 1    |
| 19.    | (B) <b><u>Ctrl+A</u></b>                                                            | 1    |

|     |                                       |   |
|-----|---------------------------------------|---|
| 20. | (a) Data and Books Management System  | 1 |
| 21. | (A) Data                              | 1 |
| 22. | CTRL+x                                | 1 |
| 23. | Style                                 | 1 |
| 24. | Record                                | 1 |
| 25. | Paragraph style                       | 1 |
| 26. | Query                                 | 1 |
| 27. | Definitions                           | 1 |
| 28. | Definitions                           | 1 |
| 29. | Uniform serial Bus                    | 1 |
| 30  | Information Technology Enable service | 1 |
